Cottrell's C-7510ST low side frame trailer is the new kid on the block in comparison it to some of our existing work horses. Since its debut in March of 2003 this trailer has proven to be an asset to the industry. This trailer is gaining market share by flexing its muscles with strong door openings and versatility that is unparalleled within the industry. If you want a 7-car low rail trailer with hi-rail capability this is the trailer. This trailer is compatible with Cottrell's 3-car headramp mounted on sleeper and day cab chassis. Contact an experienced sales representative immediately. They are excited to assist you.
