

# POWERPAC APU

## NOISE REDUCTION SYSTEM

### → Specifications

With Power Tech's 17+ years of generator technology advancement, combined with Dometic's 45+ year heritage in rugged HVAC technology you won't be left stranded years down the road.

Together Power Tech and Dometic® have teamed up to give you an Idling Solution that

- Is Fuel Efficient
- Is Rugged enough for the Open Road
- Provides all the comfort and conveniences you need
- Reduces Idle time
- Increases Profits
- Complies with Federal Law
- Meets Emission Regulations
- Is Serviceable Nationwide
- Has Been Field Tested Under Rigorous Conditions

Power Tech has been designing and building generator sets for nearly a quarter century for a wide variety of applications such as Tour Buses, Motor coaches, Satellite Communication Vehicles for Industrial and Military use, Yachts, Rescue Vehicles, as well as Emergency Back-up Power Systems for a wide Variety of Critical Infrastructures.

Power Tech is unmatched in field service and reliability, backed by a North America's most responsive service dealer network.

The System offers simple single touch controls with condition indicators located inside the cab for the extra convenience of the operator.

Attaches To Frame With Clamps  
(No Drilling)

5 KW Generator

14,000 BTU Cooling  
2500 Watts Heat

4-110 Volt Outlets Inside  
1-110 Volt Outlet Outside

### → Engine Specifications

Caterpillar CO.5  
8.5 HP @2800rpm  
Diesel, 4 cycle  
2 Cylinder In-Line  
Bore & Stroke 2.64 x 2.83  
(67 x 72mm)

23:1 Compression Ratio  
3.7 quarts (3.5L) Oil  
5 quarts (4.7L) Cooling

15% Bio Diesel is an approved fuel for this engine
